STRONGER TOGETHER

A Stronger Community for a Brighter Tomorrow

Community Impact Report
2024–2025

Introduction

Stronger Together is a community-led initiative focused on early support, practical skills and social connection. The project aims to help individuals and families overcome challenges, build confidence and participate in a stronger, more resilient community.

This report summarises the project's stated delivery figures, its four areas of support, the activities delivered, the community-led approach and the priorities for future work.

12	24+	600+	650+
MONTHS OF DELIVERY	ACTIVITIES	MEMBERS SUPPORTED	BENEFICIARIES REACHED

Our purpose

The project responds to challenges identified in the community, including social isolation, emotional difficulties and financial pressures. Its approach is proactive: offering support and opportunities before challenges escalate, while helping people develop confidence, skills and relationships.

Our Support Areas

Stronger Together focuses on four connected areas of support:

1. Mental Well-being

Activities provide opportunities for people to talk, learn and build resilience, with the aim of supporting healthier lives and emotional well-being.

2. Social Inclusion

Events and community activities bring people together, encourage new relationships and help reduce social isolation.

3. Financial Literacy

Workshops focus on practical financial knowledge and confidence, supporting people to strengthen their financial resilience.

4. Employment Skills

Back2Work training supports skills development and confidence, helping participants explore pathways towards employment and greater independence.

Activities Delivered

The report records more than 24 activities delivered during the project period. The listed activities include:

Activity	Number delivered
Mental health sessions	6
Social inclusion events	6
Financial literacy workshops	2
Back2Work trainings	2

These listed categories account for 16 activities; the original report states 24+ activities overall.

Reach and Community Impact

The report states that 600+ community members were supported and 650+ beneficiaries were reached. It also identifies 300+ individuals receiving direct support. The report describes beneficiaries as including families and marginalised groups, such as parents, carers, children and low-income households.

Connections Created

The project highlights several types of community connection: new friendships and peer-support networks, stronger links with local services, and greater collaboration with schools, community centres, faith groups and other community organisations. These connections are intended to help create a more connected, confident and resilient community.

A Community-Led Approach

The project's delivery approach was informed by local voices. The original report states that more than 100 community members were consulted, a steering group was established, quarterly open forums were held, and activities were adapted in response to community needs.

Looking Ahead

The next priorities identified in the report are to continue and expand support over the next 12–18 months, reach more individuals and families, strengthen local partnerships, create further opportunities and develop a sustainable model for long-term community impact.

Together, we can build a stronger, more resilient community.
